SFX Catalogue

Sweet SFX is a catalogue of professional and high quality recording sessions created by [Sounding Sweet](#)

Vehicles | Cars

All car vehicle sessions have been recorded on track using the very best microphones and recording equipment by experienced recordists. They are easy to use, delivered as Reaper sessions (all sessions are minimum 96kHz 24 bit and around 1 hour runtime per car).

Car recordings include:

- 12-16 channels onboard including the engine bay, exhausts and surround sound internal cabin recordings
- Various trackside static and handheld perspectives
- Synced timecode
- Edited but unprocessed raw source material

We are offering full session content including: Ramps / Sweeps (acceleration and deceleration) in multiple gears, general driving, steady idles, starts, stops, revving and other manoeuvres.

(The libraries on our [Sweet SFX website](#) do not contain as much detail. For example less channels, variation and do not contain the ramps/sweeps necessary for granular vehicle audio technology in video games)

Vehicles | Motorbikes

All **motorbike vehicle sessions** have been recorded on track using the very best microphones and recording equipment by experienced recordists. They are easy to use, delivered as Reaper sessions (all sessions are minimum 96kHz 24 bit and around 30 minutes of runtime per motorbike).

We used the same rider for their skill and consistency of manoeuvres.

Bike recordings include:

- 4-8 channels onboard including multiple engine and exhaust microphones
- Various trackside static and handheld perspectives
- Synced timecode
- Edited but unprocessed raw source material

We are offering full session content including: Ramps / Sweeps (acceleration and deceleration) in multiple gears, general riding, steady idles, starts, stops, revving and other manoeuvres.

(The libraries on our [Sweet SFX website](#) do not contain as much detail. For example less channels, variation and do not contain the ramps/sweeps necessary for granular vehicle audio technology in video games)

Vehicles | Surfaces

Our **Surface sessions** have been recorded across 3 sessions using the very best microphones and recording equipment by experienced recordists. We used quiet electric cars with onboard and external microphones including ambisonic interiors. Cars were driven on multiple surface including skid pans in multiple weather scenarios.

They are easy to use, delivered as Reaper sessions (all sessions are minimum 96kHz 24 bit, totalling 3.5 hours runtime)

Example surfaces:

- Dry tarmac
- Wet tarmac
- Concrete
- Dirt / gravel
- Grass
- Cobble
- Puddle
- Drain
- Pothole
- Rumble strip
- Cats eyes
- Ridges
- Manhole cover
- Speed bump
- Wooden planks

Example manoeuvres:

- General driving
- Steady speeds
- Braking
- Skidding
- Understeer
- Scrubbing
- Burnout
- Spinout
- Lockup
- Slalom
- Surface transitions

Millbrook surfaces - Honda Skid Car on skid pan

Dry tarmac
Wet tarmac
Dry concrete

Millbrook surfaces - Tesla

Pothole
Rumble strip
Cats eyes
Manhole cover
Cobble
Speed bumps
Puddles
Wooden planks

Enstone surfaces - Tesla

Dry tarmac
Wet tarmac
Dry dirt / gravel
Puddles
Grass

Vehicles | Foley

Our Foley sessions were recorded in a semi-anechoic chamber using various onboard and external microphones.

We recorded anything apart from the cars driving, for example:

- Door shuts
- Boot shuts
- Struts
- Suspension
- Horn
- Alarm
- Dry gear changes
- Handbrake
- Switches
- Indicators
- Window movements
- Windscreen wipers wet and dry
- Interior impulse responses
- Ignition use
- Starts
- Stops
- Revs
- Idles
- Sun roofs
- Convertible roofs

sounding
sweet

Animals | Big Cats

Our Big Cats sessions were recorded at a big cat sanctuary during the quietness of a COVID-19 lockdown. We had a handler and access which enabled very close proximity. We used microphones such as Sanken CO-100K, DPA 4017, 4011, 4062, Sennheiser Ambeo. They are easy to use, delivered as Reaper sessions (all sessions are 192Khz 32 bit float).

Example behaviours:

- Growling
- Howling
- Snarling
- Snorting
- Purring
- Hissing
- Groaning
- Grunting
- Breathing
- Biting / chewing

African Lion

Amur Leopard

Amur Tiger

Cheetah

Puma

Snow Leopard

White Lion

White Lioness

White Tiger

Weapons | Black Powder

Our **Black Powder sessions** are great for any project that needs authentic, historical weapon sounds, or even just used to sweeten up your impact sound designs.

Perfect source for rifle cracks, booming cannon shots and shotgun blasts.

As well as recording each weapon's gunshots, we also recorded the Foley of each weapon – reloading, muzzle loading, dry fires, powder ignition (cannon), charge loading (cannon), general weapon handling etc.

Recorded with seven different recorders and 26 microphones: mono, stereo and 5.1, all at different perspectives and distances.

You will receive:

- Reaper and Pro Tools session which have all the tracks, audio files and video files.
- A readme file detailing the specifics of the library, recording and editing sessions.
- A map of where microphones were placed.

Weapons | Black Powder

Quarter Scale Cannon

12 Bore Shotgun Over and Under
(Nitro Powder)

12 Bore Shotgun Pump Action
(Nitro Powder)

12 Bore Shotgun Semi Automatic
(Nitro Powder)

Colt 1851 Navy Revolver

Pattern 1861 Enfield Musketoon

Short Barrel Shotgun

Single Barrel Shotgun

Snider-Enfield 1861 Artillery
Carbine

Information | Licensing & Contact

- Sweet SFX libraries are licensed on a per-user basis (starting at 5 seats for use in video games)
- We do not limit the license to a particular / specific game or production.
- Our End-User License Agreement can be found on our sweet sfx website here: <https://sweetsfx.com/licensing/>
- Pricing is available on request. Please specify the libraries you are interested in and the number of seats required.
